

FLUID TRANSFER SYSTEMS

To whom which may be concerned

Our stay in this house was very pleasant:

Every time we've had a technical problem in the house our landlords came very quickly and repaired it most of the time themselves or did all the useful phone calls for the technicians : so we didn't have any problem in taking care of the house especially with the problem of language: the czech language is difficult!!.

Beside problems with the house,we asked them many times for help concerning some adresses about any kind of things(place to find furnitures.,to eat...)and our landlords were really helping us nicely ,called for us,tried to find out if they didn't know what we were looking for!

We had a very good relationship with our landlords,even sharing some food!

We highly recommend our landlords without any doubt and we want to thank them for the warm welcoming and for all kind of help they gave us during our stay in their house and in Czech Republic!
